Chemical Research in Toxicology
November 2008

Willem H. Koppenol

The authors describe the preparation of chemically pure sodium and lithium peroxynitrite solutions—useful reagents for biological research—via an ion-exchange process.

[Ring Your Polymers](#)

Macromolecules
November 2008

Zhiqun Lin

Controlled evaporation of a solution of polystyrene and poly(methyl methacrylate) causes the incompatible polymers to self-organize into concentric rings.

Chemical Abstracts Service

CAS provides the world's largest and most current collection of chemical and related scientific information.

ChemInsight

The definitive source for experts in chemistry and applied sciences.
